DOWEX

Ion Exchange Resins

Typical properties and applications:

DOWEX HCR-S/S cation exchange resin is a high capacity resin with excellent kinetics and good physical, chemical, and thermal stability.

Packaging:

25 liter bags or 1 cubic foot bags.

Figure 1. Backwash Expansion Data

Temperature = 25°C (77° F)

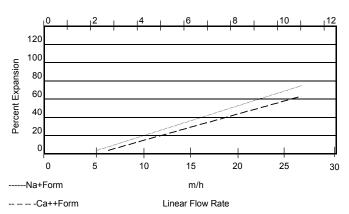

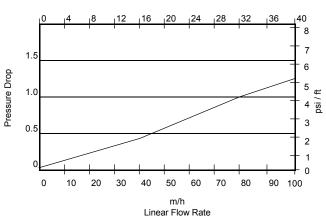

Figure 2. Pressure Drop Data

Temperature = 20°C (68° F)

For other tempertures use:

 $F_T = F_{77^{\circ}F} [1+0.008 (T_{\circ}F - 77)], \text{ where } F \equiv gpm/ft^2$ $F = F_{77^{\circ}F} [1+0.008 (1.8T_{\circ}C - 45)], \text{ where } F \equiv m/h$

For other temperatures use:

 $P_T = P_{20^{\circ}C} / (0.026 \text{ T}_{^{\circ}C} + 0.48)$, where $P \equiv bar/m$ $P_T = P_{68^{\circ}F} / (0.014 \text{ T}_{^{\circ}F} + 0.05)$, where $P \equiv psi/ft$

Warning: Oxidizing agents such as nitric acid attack organic ion exchange resins under certain conditions. This could lead to anything from slight resin degradation to a violent exothermic reaction (explosion). Before using strong oxidizing agents, consult sources knowledgeable in handling such material.
